

## TMS Pro Unified Messaging

Auto Attendant, Voice Mail, Personal Mailbox Management  
from your PC!

TMS Pro is a robust voice processing system that seamlessly integrates with the TDS Platform to provide your company with efficient call handling and message management.

Automated Attendant is thoughtfully designed to answer calls with different greetings at various times of the day and week. Multi company greetings are also supported as well as up to 3 different languages.

Voice Mail and Unified Messaging assures customers leave a message directly in a mailbox and delivery takes place with a variety of notification options. TMS PRO can deliver a message in the form of an e-mail and is compatible with Microsoft Outlook.

Personal Mailbox Management means you can control aspects of voice messages directly from your PC client operating on your local area network.
