GENERAL OPERATION

To Adjust Speaker Volume during a Call

You can adjust the speaker volume during a call by pressing the volume control buttons on the side of the Ear and or the volume control keys on the DK6 phone according to your preference.

Operation Range

The DK6 Blue Tooth Interface is a very low power radio communication device. The radio communication range between the DK6 and the Headset is approximately 10 meters. Please keep both units within this range for best communication performance.

EAR PIECE SETUP

Most headsets will allow you to wear the headset on your right or left per your preference. Please consult your Blue Tooth Headset user guide for the setup required.

MAINTAINANCE

As high temperature will shorten the battery life, please do not leave your Headset in an environment with temperatures over 100°F or in direct sunlight.

Keep your Headset away from moisture.

To clean, use soft cloth with mild liquid soap to clean the exterior of your Cordless Headset and phone. DO NOT

use abrasive chemical detergent or material to clean the Headset.

DO not attempt to pry open the cover of your Cordless Headset or change the batteries. Seek assistance from an AUTHORIZED dealer near you.

TRANSTEL DESIGNS AND MANUFACTURES A SPECIAL INTERFACE CARD IN COMPLIANCE WITH THE BLUETOOTH 2.0 SPECIFICATION. THIS IS COMPATIBLE WITH HEADSETS AVAILABLE THROUGH YOUR LOCAL DEALER OR GENERALLY AVAILABLE AT MANY RETAIL OUTLETS.
